

NEXT-GEN COMPOSITE SYSTEM

Offering holistic materials, equipment,
and process solutions.

Our specially formulated coating and advanced manufacturing techniques provide a safer, more efficient production process that eliminates VOCs and styrene, reducing exposure to these hazardous chemicals and enhancing environmental safety. Automated processes, minimized rework, and fewer field repairs mean parts are lighter and more durable; while also providing design flexibility and increased cost-savings. Partner with XCoatings to improve your operational efficiencies and production quality.

Environmentally Friendly & Safe

No VOCs or styrene emissions, promoting a healthier workplace and environment.

Eliminate Emission Cap Constraints

Viable solution to mitigate VOC emission cap limits.

Increased Production Efficiency

Faster cycle times and automatable processes for improved output.

Design Flexibility & Market Proximity

Can be applied to tighter radii, enabling innovative designs and closer manufacturing to market outlets.

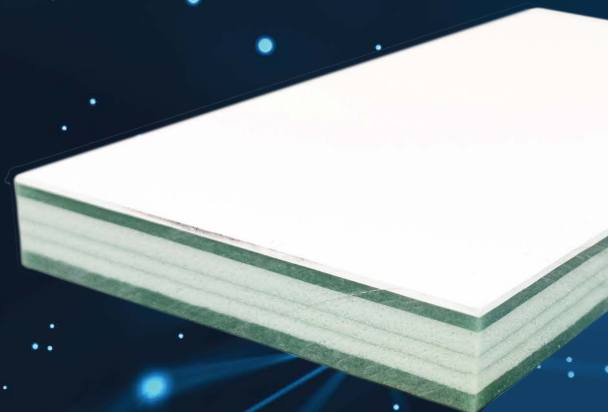

Enhanced Performance & Durability

Tougher, stronger, and lighter parts with reduced breakage and rework.

Highly Customizable

Physical properties can be designed via combination of multi-laminate layers from our extensive library of custom formulations.

Cross-section of 4-layer sandwich panel: gelcoat, first hardcoat, foam core, and second hardcoat.

From Materials to Equipment, Your Complete Partner in Composite Innovation

As part of the American Polymers Network, we leverage over 1,000,000 sq. ft. of manufacturing facilities across California, Texas, and additional U.S. locations, backed by advanced R&D and nationwide distribution. This scale enables us to deliver consistent, high-performance solutions with responsive, customer-focused service.

Our holistic approach combines materials, equipment, and process solutions—strengthened by direct access to Diamond Liners, an authorized Graco distributor. This partnership ensures customers receive the highest level of equipment expertise, technical support, and reliable service alongside our advanced materials.

XCoatings isn't just a supplier, we're your partner in building stronger, more sustainable, and more efficient composite systems for the future.
