# NEXT-GEN AUTOMATION

## Styrene Free, No Chopped Fiberglass Polyurethane Spray Applied Coatings

Our specially formulated coating and advanced manufacturing techniques provide a safer, more efficient production process that eliminates VOCs and styrene, reducing exposure to these hazardous chemicals and enhancing environmental safety. Automated processes, minimized rework, and fewer field repairs mean parts are lighter and more durable; while also providing design flexibility and increased cost-savings.

Partner with X Coatings to improve your operational efficiencies and production quality.

### Environmentally Friendly & Safe

No VOCs or styrene emissions, promoting a healthier workplace and environment.

### Increased Production Efficiency

Faster cycle times and automatable processes for improved output.

### Design Flexibility & Market Proximity

Can be applied to tighter radii, enabling innovative designs and closer manufacturing to market outlets.

### Enhanced Performance & Durability

Tougher, stronger, and lighter parts with reduced breakage and rework.
